<p>(54) Title: OIL-FREE HYDROXYETHYL CELLULOSE LIQUID POLYMER DISPERSION</p>	
<p>(57) Abstract:</p> <p>The present invention is directed to an oil-free, water-soluble, liquid, polymer dispersion for use in thickening aqueous mediums particularly completion and workover fluids used in the oil and gas drilling business. The dispersions of the present invention are comprised of hydroxyethyl cellulose and propylene glycol derivatives, preferably both propylene glycol polyether polyols and an aliphatic propylene glycol ether. Optionally these dispersions include water. Because of their low toxicity, these dispersions are particularly useful for drilling in offshore environments. These compositions rapidly disperse in and viscosify a variety of brines, including sea water and other light brines, with minimum shear and without fisheye formation.</p>

The 1% inhibitor temperature remains constant at 70°C throughout the 16-hour period.</p>	
<p>(57) Abstract</p> <p>Agent and method for establishing different types of zone sealings particularly in oil wells and gas wells, wherein the zone to be sealed is supplied with a composition comprising: monomers, an initiator for heat-induced production of free radicals, a pot life extending inhibitor for stabilization of free radicals, and optionally other additives. The composition is subjected to radical polymerization induced by heat in the well zone and at a temperature of 5–120° C, and establishes a cured mass, particularly at temperature in the range of 65–100° C. The composition is supplied with an at least partly unsaturated prepolymer selected from the group consisting of polyester and epoxy vinyl ester, including one or more vinyl-containing co-monomers selected from the group consisting of styrene, vinyltoluene, 2-hydroxyethyl-methacrylate and 2-hydroxypropyl-methacrylate. The prepolymer is present in a quantity of 15–75 weight parts and the vinyl-containing co-monomers are added in a quantity of 75–15 weight parts. The composition is particularly suited for low temperature applications.</p>
